Chapter 1

What Is a Website?

A website is a collection of digital pages that people can access through the internet using a web browser.

Websites can be used for many purposes:

- Education
- Online stores
- Gaming
- Businesses
- News
- Portfolios
- Creator websites

Example:

Badmash Books can use a website to display eBooks, descriptions, prices and purchasing information.

Chapter 2

How Websites Work

When you enter a website address into your browser, several things happen.

`https://example.com`

1. You type the address in your browser

2. Your browser requests information from a web server

3. The server sends files back to your browser

4. Your browser interprets those files and displays the website

Chapter 3

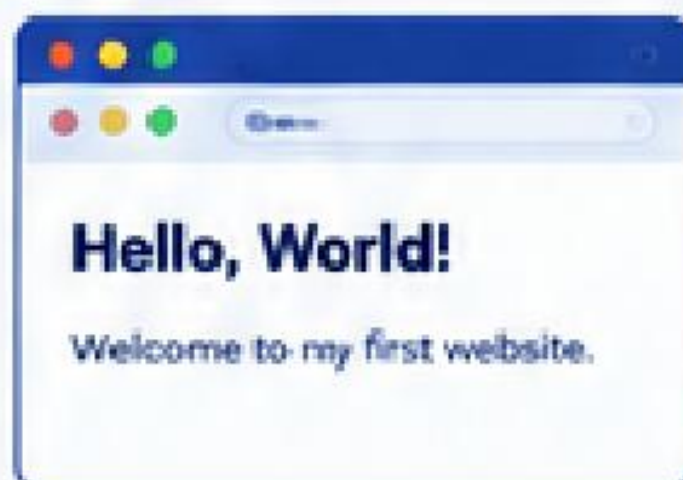

Your First HTML Page

Create a file named `index.html` and enter this code:

```

1  <!DOCTYPE html>
2  <html>
3    <head>
4      <title>My First Website</title>
5    </head>
6    <body>
7      <h1>Hello, World!</h1>
8      <p>Welcome to my first website.</p>
9    </body>
10 </html>

```

Key Tags

```

<!DOCTYPE html>
<html>
<head>
<title>
<body>
<h1>
<p>

```

Chapter 8

Introduction to JavaScript

JavaScript adds behavior to your website.

```
1 <button onclick="sayHello()">
2   Click Me
3 </button>
4
5 <script>
6   function sayHello() {
7     alert("Hello!");
8   }
9 </script>
```

Variables

```
let name = "Badmash Books";
console.log(name);
```

Simple Calculation

```
let price = 149;
let quantity = 2;
let total = price * quantity;
console.log(total);
```

JS

JavaScript
makes your site
interactive!

Chapter 6

Learning CSS

CSS makes your website look good.

Example (inside `<style>`):

```
1  <style>
2    body {
3      background: #0b0b0b;
4      color: #fff;
5    }
6    h1 {
7      color: #8a2be2;
8      font-size: 50px;
9    }
10 </style>
```

More CSS Properties

- **color** – changes text color
- **background** – sets background color
- **padding** – adds space inside an element
- **margin** – adds space outside an element
- **border-radius** – rounds corners

**CSS makes
it beautiful!**

**Try it yourself
and experiment!**

Chapter 11

Publishing Your Website for Free

Use GitHub Pages to host your website.

Steps:

- 1 Create a GitHub account
- 2 Create a new repository
- 3 Add your index.html
- 4 Enable GitHub Pages
- 5 Your website goes online

Chapter 14

Five Practice Projects

1

Personal Profile

Name, photo, about, hobbies, contact.

2

Book Page

Cover, title, author, description, price.

3

Calculator

Simple calculator using JavaScript.

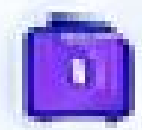

4

Portfolio

About, skills, projects, contact.

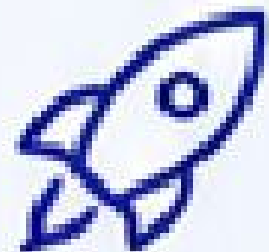

5

Mini eBook Store

Home, books, categories, about, contact.

Small projects...
Big skills!

Chapter 10

Building a Complete Website

A simple structure might look like this:

Example (Product Card)

```

<div class="book">
  <h2>Build Your First Website</h2>
  <p>A beginner-friendly guide to HTML,
    CSS and Javascript.</p>
  <strong>FREE</strong>
  <button>Buy Now</button>
</div>
  
```

Build. Learn. Create.

Thank you for reading!

We hope this eBook helps you build
your first website and take your
skills to the next level.

The best time to start
was yesterday.
The next best time is now.
